

Learning Objectives

This week we will cover a commonly used Java Build tool that is typically used in many follow-on courses within this Computer Science track.

Students will be able to

1. Understand the need for Java Build Tools
2. Understand what Maven is used for, how to install and configure it, and build a simple runnable JAR file
3. Understand what ReST services are
4. Incorporate the Maven plugin into Eclipse, and build a simple runnable JAR file
